

ITEM NUMBER: **DROP-IN-KIT**

LED Drop-In and Multi-Function Tailcap Kit!

Retail: \$89.99

Your Price: \$84.99

Have you ever wanted a light with the legendary reliability and quality of a surefire but with performance compatibility of cutting edge technological development? As we all know SF makes the absolute best quality illumination instruments in the world. However, their very perfectionism and requirements of extensive R&D and field testing means that many times the technological performance is not at the cutting edge.

After working extensively with the designer, we are happy to announce the new LED Drop-In and Multi-Function Tailcap Kit! This Patent-Pending cutting edge technology with its advanced electronic circuitry provides a multitude of options at an unprecedented price point! The kit offers the following,

- A new high output lamp that produces an amazing 256 lumens of light at its brightest setting for 2hrs+ continuous use and over 200 hours at low output!
- A revolutionary circuitry tail cap that operates
 1. 5 levels of brightness on the tail cap or side switch (Depending on Model)
 2. Fast or slow strobe features which is blinding and disorientating to say the least at 256 lumens!
 3. Momentary on
 4. Unique luminous side switch

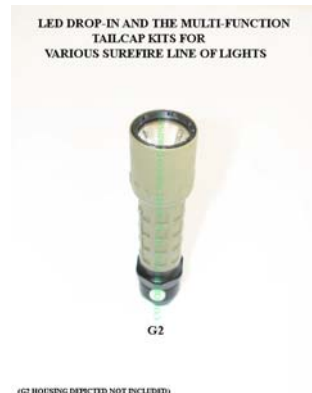

There are two kit packages offered.

-5-step adjustment

Item# **DROP-IN-KIT-5**

-Infinite Adjustment

Item# **DROP-IN-KIT-I**

-Each kit is also available in a “Reversible” Model where the side switch performs the primary functions instead of the tail cap.

-5-step adjustment “Reversible” Item# **DROP-IN-KIT-5R**

-Infinite Adjustment “Reversible” Item# **DROP-IN-KIT-IR**

(PLEASE SPECIFY WHAT MODEL YOU DESIRE)

Here is the typical operation of the 5-step adjustment kit.

LED Drop-In Multi-Function (5step) Tailcap Functions: Five levels Adjustable brightness tail cap package: Main switch: Click for Five levels brightness: minimum to maximum in 5 steps Side switch: Click-on for 100% output; release, return to original state. Press quickly for off. Tactical switch, momentary-on function. Combination: Press both switches for strobe; release for slow strobe. Press either one, return to original state.

Infinite adjustable brightness tail cap package: Main switch: Press lightly, minimum output, press for and hold to increase to maximum output, press and hold again to decrease to minimum output. Side switch: Lock-on, from original state to 100% output; release, return to original state. Press quickly for off. Tactical switch, momentary-on function. Combination: Press side switch, and then press main switch, then release both at the same time, strobe. Press either one, return to original state.

Technical Specifications:

Working voltage: 4.0-15.0v

Maximum output at the emitter approximately 256+ lumens

-Run Times: 2-3 hours (High Output), 6 hours+ (Low Output)

-1 year warranty

-The package will fit the following SureFire Lights: G2, G3, 6P, 6PD, 9P, Z2, G2Z, C2, C3, M2

I am sure you will very happy with the functionality of this kit. I have found the ergonomics of using a side-switch thumb function is a very welcomed asset. My low cost G2 has been converted into a TRUE fighting light! I will also be displaying these new kits at the Shot Show in Vegas at booth 20052.

Price: **\$89.99** plus shipping. Of course I accept PP, CC, MO’s and Cashiers Checks.
