## **“Da Torch” Dedicated Long Range IR Illuminator – Fixed Beam**

Retail \$169.00

**Savings \$20.00**

**Your Price \$149.00**

I introduced this unit several years ago and it has gone to be my best NV accessory item to date. The units have been used in Afghanistan, Iraq, etc. from our brave military members. I can honestly state this is the best long-range weapon mountable IR illuminator I've handled period. The LED unit itself puts out approx. 1000mw + and with 6X Raptors, D-760's, etc. I've illuminated targets up to 400m! The variable beam torch has an effective range of 500m+ A good example of the power this unit produces; The unit powered up with plenty of daylight in a 30' x 20' room and viewing with a PVS-14 with its day cover on actually saw the beam 30 feet away on the opposite wall! The unit can be used for CQB, but its true excellence shows up at 50m and beyond with magnified NVD's! The unit is a must have for all Gen 2 devices as these units bring the most out of a Gen 2 device.

The unit itself is made of armored rubber and a polyurethane bezel. It is water resistant, not submergible. The unit is powered by one 3-volt C123 lithium battery (supplied) along with a toggle pressure on/off switch located on the top of the unit. It also comes standard with a weaver/Picatinny mount and 1-year manufacturers warranty. This version has a fixed 9 deg beam. The units weight comes in SLIGHTY (I do mean slightly) heavier than a M1 millennium, but 3 times the viewing distance!

An optional pressure switch is available under our NV accessories for **\$49.00** and a new variable 5 position silent power switch is **\$59.00**.

You can see my in-depth IR illuminator Shoot-Out under my review page here to see a great comparison of the top IR illuminators on the market. <http://www.ar15.com/forums/topic.html?b=2&f=209&t=152963>  
The unit's price is **\$149.00** plus shipping and insurance. Payment's accepted include Paypal (plus fee's) CC, MO, and personnel checks (must clear first). Worldwide shipping allowed.
