

Item Number: **MUM-14-SA**

### **Gen 3 Select A Multi-Use-Monocular (MUM)**

Retail: \$3,699.00

**Savings: \$200.00**

**Your Price : \$3,499.00**

The MUM, is a unbeatable combination of versatility, performance, and price. The MUM is the latest, lightest, and the most versatile night vision system on the market. Developed as an alternative to the US Military issue AN/PVS-14, it is capable of operating in depths of over 60 feet and uses multi-type (AA or CR123) single battery. With the use of optional accessories, MiNi-14 can be configured for any mission requirement:

- Hand held spotting scope (can be used alone, with optional magnification lenses, or attached to a daytime spotting scope with the optional universal adapter)
- Hand held binocular (with the optional Dual Bridge Mount and with or without the optional magnification lenses and adapters)
- Hands free mono-goggle (with the included headgear or optional helmet mount)
- Hands free dual tube goggle (with the optional Dual Bridge Mount and the included headgear or optional helmet mount)
- Day/Night weapon sight (with the use of the included weapon mount and optional EoTech, or attached to an existing rifle scope with the optional universal adapter)
- Surveillance and night-time photography (with the use of the optional universal adapter)

See a full line of Accessories on our main page.

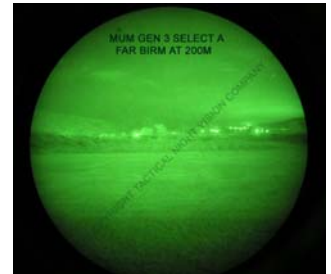

Of course the standard accessories on the MUM kit will include the following;

- Soft Carry Case
- Quick-Release Mil.Spec. Headgear/Helmet Mount Adapter
- Quick-Release Weapon Mount (original style)
- Mil.Spec. Headgear w/extra Brow Pads
- Demist Shield
- Sacrificial Window
- One 3V CR123 Battery
- Tube Data Card
- One AA Battery
- Lens Cleaning Paper
- Operating Manual

- Operating Temp. -40° F to 122° F -40°C to +50°C
- Warranty 2 years

If you want the absolute best I offer Hand Select Tubes as well. All image intensifiers have some imperfections. The combination of high performance and clean cosmetics is both rare and expensive (look at full mil.spec. tubes). The Select tubes provide a superior alternative for your hard-earned money. All of these intensifiers offer high performance numbers and, while there are some cosmetic imperfections, they in no way debilitate in their use. Having considered the possibility that some of you are very picky perfectionists (myself included), I also offer the Hand Select version, which includes both very high specs and minimum to none imperfections. If your mission calls for the best, I can accommodate you. Price for this option is **\$295.00**.

**Here are the typical specifications of the Hand Select image intensifier:**

- Thin-Film (weapon mountable)
- Resolution: 64 lp/mm (downgraded), 72 lp/mm (actual, FOM)
- Signal-to-Noise: 23+
- Photo Response: 2100+

**Price for the basic MUM package, which includes a Select tube and the standard MUM accessories outlined above, is priced at \$3,499.00 and \$3794.00 for the hand select option.**

For all the NV gear, I accept CC and paypal (please add the 3%) and of course Cashiers Check and Money order. Prices do not reflect S/H or Insurance. Of course I must state, NO shipping outside of the United States of America! Returns of non-defective NV scopes require 15% restocking fee.
